This latter is rendered most difficult by reason of the declivity of the country, as well as by the permeability of the ground in the zone of the mining concessions. In order to pass from the Rhine to the summit-level pond, whose water level is 183 feet above the North Sea, there have been constructed two locks of 16 feet fall, and two Gruson plunge elevators, with a fall of 32j and 46 feet, respectively. The section of the canal and the constructive works will have the same dimensions as in the canal from Dortmund to the Ems. The industries of Westphalia are still, however, urging upon the Government to enlarge these dimensions so as to permit the passage of the large Rhine boats. They ask that the locks may be 279 feet in length and 34 feet in width....
