I shall always insist more on the separate liquefaction of copal than on the possibility of completing the mixture of it with a drying oil, to form a varnish of the fifth genus. This new means enables the artist to compose a very durable and nearly colourless varnish, superior to copal varnish composed with drying oil, as the composition of the latter requires processes which alter the essential qualities of the substances that form the basis of it. For operations on a larger scale, the dimensions of the furnace may be changed; but in this case it will be proper to put the fireplace, properly so-called, on a kind of iron tripod, as represented at G, Fig. 26, in order that the workman may be more at his ease. I must,...
