When you re 50 or 60 years old, the job market is a combat zone, no matter what your skills or experience. Battle-scarred veterans report that they re passed over time and again for jobs they are eminently qualified for. Successful applicants, often with fewer skills and almost always with far less experience, do seem to have one significant thing in common: they are younger, sometimes painfully younger. There was a time, not that long ago, when you automatically retired at 60 or 65, presuming you actually lived that long. Today, many seniors are still going strong at 60, 70, even 80 and don t intend to retire. Or they ve tried the beach hut or snow cottage and found them boring. Increasingly, many such seniors are choosing new careers, ones that fit their particular strengths. Finding a Job After 50 is a guerilla guide that gives you the powerful tools you need to substitute real satisfaction for the rat race. Getting the job you want may be a battle, so you have to approach it as such, equipping yourself with the right weapons to succeed in today s job market. Your arsenal better be well stocked before you enter the fray. You are probably healthier, better educated, and more experienced than any previous generation at the same age. You may be the best man or woman for the job. But youre going to have to prove it. To do so, you must know what (and who) you re up against and how to beat it (them)! This book will show you how.
